<u>Am ndments to the Specification</u>

Replace the paragraph starting at pag 6, lin 2 with the following:

By interacting with software 132, user A may generate a message 122 to be transmitted to a computer system of user B. This message 122 may include any content, such as a greeting, a reminder, a letter, a statement of good wishes, and so on. The message 122 may take any form, including ASCII text, audio data recorded from a microphone, a video segment (with or without audio), and so on. User A may also select a dedication 124 for user B. This dedication 124 identifies media content to be experienced by user A<u>B</u>. User A may identify one or more insertion points 126 for the message 122 and the dedication 124 in user B's play list 116. In one embodiment, both user A and user B on online when the dedication is made, and play list 116 is the play list which user B is currently experiencing.
